

AP Calculus AB Summer Assignment

Both AP Calculus AB & BC will need to purchase the book below. This is Barron's AP Calculus Prep Book, 14th Edition. Each class has a different summer assignment as well as a different agenda the first week back to school. Please see below for your course that you will be enrolled into for the upcoming fall semester. I am not looking for the assignments below to just be complete. They need to be complete and you need to have a solid understanding of the material entering day 1 of school.

AP Calculus AB:

Barron's: P. 102 #1-42 all

You will have a test on the above within a few days once you return from the summer. This can change depending on how the beginning of school goes. It may become earlier or later.
