

You are expected to complete all the problems below before the first day of school. You may be tested on these ideas and concepts in the first week of school. Please complete all the problems to the best of your ability. You **MUST** read and take notes on the sections. If you do not take notes, read the sections, or finish the problems, you will be behind when the class starts. If you have any questions or concerns, please write them down and bring them to class on the first day. Many students have found this book for free through a Google search in the past. You are expected to have this book before the school year. I have included the first 5 pages of this text for your reference when searching for the book. See below.

## **Chapter 1**

Introduction - Data Analysis Making sense of data # 1 - 8

1.1 Analyzing Categorical Data # 9-27 odd

1.2 Displaying Quantitative Data with Graphs # 37-41 odd, 51, 53, 59, 65, 69, 71
